

Reimagining energy, reinventing BP: net zero by 2050

Midwest Regional Carbon Initiative

28th September 2022

Columbus, OH

Our purpose

Reimagining
energy
for people
and our planet

Our ambition

To become a
Net Zero
company

by 2050 or sooner
and to help the world
reach that goal

Our aims

Five aims to help the world meet net zero

Five aims to become
a net zero company

an international
oil company
producing
resources

to

an integrated energy company
delivering solutions for customers

Hydrogen and CCS

- We aim to capture 10% of the clean hydrogen market by 2030
- We seek to develop >10mtpa CCS projects by 2030 or sooner in areas where we can decarbonize heavy industries and can generate clean products for our customers
- We're taking a leading position in the USGC and Midwest as part of our hydrogen and CCS strategy with projects operational by mid-2026
- The US Federal and State support is enabling investment and accelerating pace

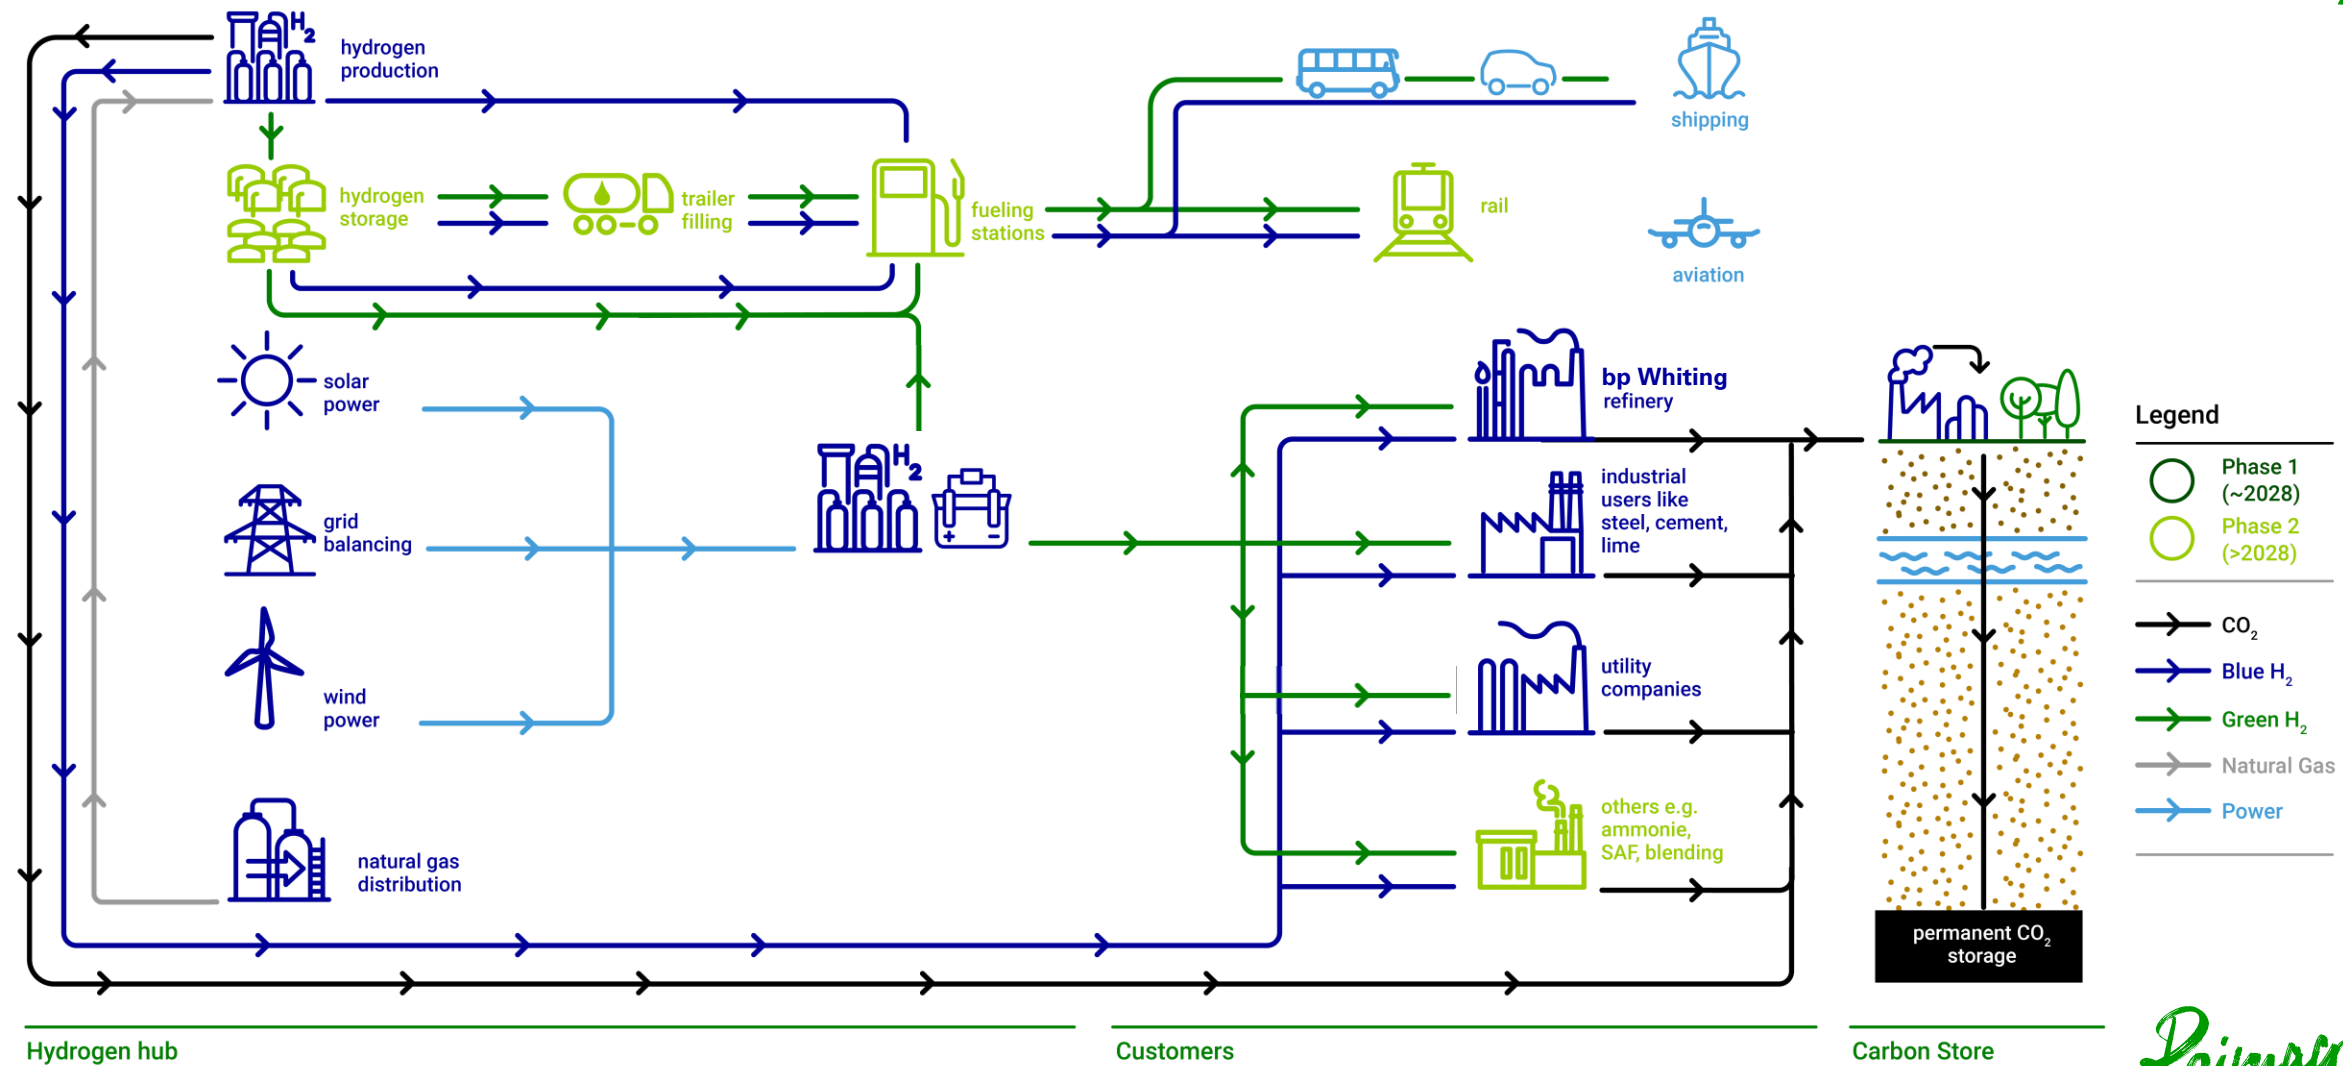

We pursue projects that can leverage the best of bp, showing up as one team to deliver value to the customer

We can build on relationships established through many years of our core businesses

Stakeholders value our deep technical expertise and trust us to do the right thing

Integrated Energy Hub Concept – Midwest
